Facial Feminization Surgery Ffs Surgeons

Facial feminization surgery (FFS) is a set of cosmetic surgical procedures that alter typically male facial features to bring them closer in shape and size to typical female facial features. FFS can include various bony and soft tissue procedures such as brow lift, rhinoplasty, cheek implantation, and lip augmentation.. Faces contain secondary sex characteristics that make male and female ...

Facial feminization surgery - Wikipedia

Facial feminization surgery isn't talked about as much as sex reassignment surgery. Everyone wants to know what's between your legs. Like, Oh, did you have the surgery?Do you have a vagina?

Sex reassignment surgery for male-to-female involves reshaping the male genitals into a form with the appearance of, and, as far as possible, the function of female genitalia. Before any surgery, patients usually undergo hormone replacement therapy (HRT), and, depending on the age at which HRT begins, facial hair removal. There are associated surgeries patients may elect to, including facial ...
