Camera lens often have an antireflective coating. This thin film of transparent material reflects part of the light at the first surface and part at the second. The two reflected waves interfere destructively to cancel out the reflection. Here is an animation from Paul Falstad.This is a wave incident on an antireflective layerThis is the same wave but no antireflective layerHave a look at (HL ...

Niels Bohr, Danish physicist, used the planetary model of the atom to explain the atomic spectrum and size of the hydrogen atom. His many contributions to the development of atomic physics and quantum mechanics, his personal influence on many students and colleagues, and his personal integrity, especially in the face of Nazi oppression, earned him a prominent place in history.
