Diversity | Definition of Diversity by Merriam-Webster

Introduction. Recent decades have been especially notable in the rapid accumulation of functional diversity studies. Still, functional diversity is in need of a consensual definition (Petchey and Gaston, 2006). A widely adopted definition is "the value and the range of those species and organismal traits that influence ecosystem functioning" (Tilman, 2001).

Functional diversity: an overview of its history and ...

Biodiversity is not evenly distributed, rather it varies greatly across the globe as well as within regions. Among other factors, the diversity of all living things depends on temperature, precipitation, altitude, soils, geography and the presence of other species. The study of the spatial distribution of organisms, species and ecosystems, is the science of biogeography.
